

We are looking for an experienced Middleweight / Senior Designer.

.....

Who are we?

We're a small but dynamic brand design consultancy based in Scarborough. We work from a 19th century listed building and serve a broad range of national clients including several high-profile hospitality brands with outlets across the UK.

Who are you?

Firstly, you'll almost certainly be degree-qualified, and you'll have a broad portfolio of high end design work. You'll understand branding and the importance of maintaining brand consistency.

You'll have excellent verbal and visual communication skills and you'll know all about managing print production processes.

You'll be experienced at dealing with clients; you'll have bags of initiative, a great sense of humour and the word 'deadline' won't bring you out in a nervous rash.

Above all, you'll be passionate about your work. You'll produce beautifully designed marketing material and you'll know that 'good enough' simply isn't good enough.

The Technical Stuff

You'll be completely fluent with Quark XPress and Adobe Creative Suite (for Mac) including Photoshop, Illustrator, inDesign. Experience of digital design using Dreamweaver would be really helpful, and good illustrative skills would be useful as well – sometimes even the most sophisticated clients like to see that old fashioned pencil and paper magic...

How to apply...

Initially, by email to studio@fitzpatrickdesign.co.uk with examples of your work

How much?

Depends on ability and experience. Let's talk.
